

TULMAR

CABIN CREW TRAINING PRODUCT

EDITION 2020

IN-FLIGHT TRAINING PRODUCTS

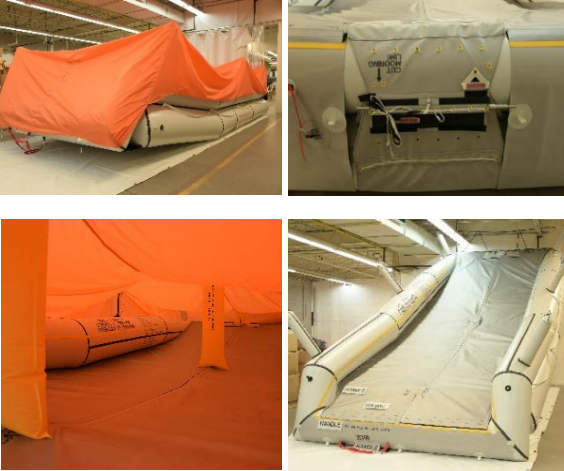

Training is at the core of every successful air carrier operation and Tulmar is a key partner in adapting training products used in cabin crew training. We apply ourselves every day to making a difference in your world.

We are a designer and manufacturer of training products, we also leverage partnerships with established brands to offer you a specialized range of training products, including evacuation slides, PBEs, life vests and survival kits.

TULMAR

TRAINING EVACUATION SLIDES

Dual Lane Training Evacuation Slide

WET & DRY TRAINING

Tulmar's training dual lane slides and rafts are a great option for your in-flight training needs. Our slides are specifically designed to replicate the experience of sliding down on the OEM slide installed on the customer's aircrafts.

Replacement Equipment (Available Separately)

- Boarding Ladder (Foot & Girt End)
- Girt
- Floor

Single Lane Training Evacuation Slide

WET & DRY TRAINING

Tulmar's training single lane slides are a great option for your in-flight training needs. Our slides are specifically designed to replicate the experience of sliding down on the OEM slide installed on the customer's aircrafts.

Our single lane training evacuation slides can be designed to be attached directly to the aircraft's door.

Replacement Floor

Made of TSO C69 approved fabric, our floor can be installed directly over the existing one allowing replacement on site of any worn sliding surface. Our floor can be customized to fit over your existing floor surface.

Ordering a Tulmar Evacuation Slide

The order process begins by understanding the project specifics, including the aircraft type, training requirements and the structure to which the slide needs to interface. A questionnaire will be sent to collect the basic information, including the desired options based on the training curriculum.

PROTECTIVE BREATHING EQUIPMENT (PBE)

All models are repairable & washable

Type 4 – Approved Essex Training PBE

P/N 6485-006 (MR-10021N) & 6485-001 (MR-10021NAA)

The type 4 has two weighted dummy O₂ cylinders and removable / replaceable neck piece. The PBE is designed to replicate the experience of using the OEM version as realistically as possible. Its weight, physical appearance and dimension closely resembles its TSO version.

Available Accessories (Sold Separately)

- P/N 6412-001: Non-Latex Neck Piece
- P/N 6412-NP: Latex Neck Piece
- P/N 6445-001: Re-usable Pouch

Type 1 – Drager Style Training PBE

P/N 6408-005

The type 1 PBE is equipped with a simulated ignition cord, nose cone, headband and weighted pouch and removable / replaceable neck piece.

Available Accessories (Sold Separately)

- P/N 6412-001: Non-Latex Neck Piece
- P/N 6412-NP: Latex Neck Piece
- P/N 6423-302: Re-usable Pouch
- P/N 6423-300: Box Assembly
- P/N 6423-205: Bulkhead Bracket
- P/N 5667-001: Nose Piece

Type 2 – BE Aerospace Style Training PBE

P/N 6483-001

The type 2 PBE is equipped with a simulated ignition candle, rear actuation pin, headband, weighted dummy O₂ Generator and removable / replaceable neck piece.

Available Accessories (Sold Separately)

- P/N 6412-001: Non-Latex Neck Piece
- P/N 6412-NP: Latex Neck Piece
- P/N 6438-302: Box Assembly – Left
- P/N 6438-304: Re-usable Pouch
- P/N 6438-301: Box Assembly - Right

Type 3 – Scott-Avox-Zodiac Style Training PBE

P/N 6444-105

The type 3 PBE is equipped with a simulated ignition candle, rear actuation pin, headband, weighted dummy O₂ Generator and removable / replaceable neck piece

Available Accessories (Sold Separately)

- P/N 6412-001: Non-Latex Neck Piece
- P/N 6412-NP: Latex Neck Piece
- P/N 6444-104: Re-usable Pouch
- P/N 6444-106: Box Assembly
- P/N 6416-208: Pull Pin Candle (Min. purchase of 15)

CLASSROOM GIRT TRAINER

Classroom Girt Trainer

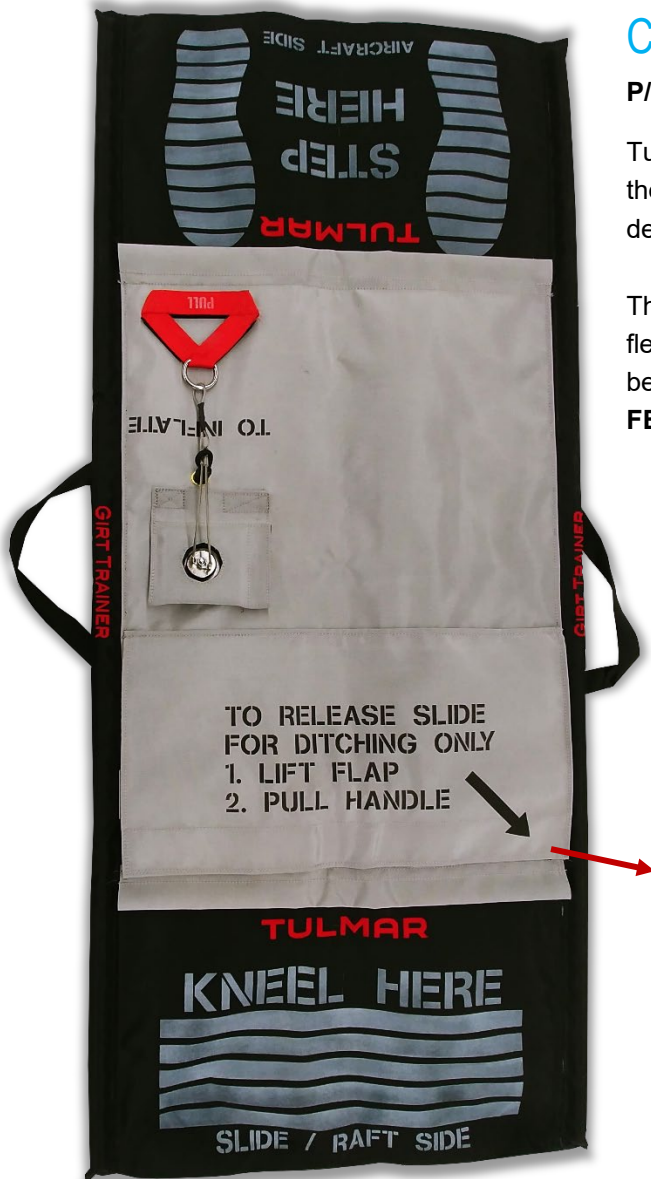

P/N 6446-001

Tulmar's dual-purpose classroom girt trainer was developed to replicate the inflation of an evacuation slide on one side as well as practicing detachment of the slide raft from the aircraft on the opposite side.

The classroom girt trainer is made to provide you the mobility and flexibility you need. It is easy to carry and set up where you need it to be, beside your simulators or in a classroom environment.

FEATURES

- Uses realistic pull force for both pull to inflate and pull to release slide
- Replicates motion (pull movement, sequence of actions)
- Includes lacing under girt flap to replicate girt to slide attachment
- Anti-skid under the girt for training on multiple surface types
- Quick and Easy to setup
- Handles on the back allow to fold the girt trainer into its own valise
- Quick reset for back to back training (under 5 seconds!)

Pull to release simulates the lacing of the girt and the detachment process.

Girt Trainer Closed for Transport & Stowage

PARTS AVAILABLE

- Pull Handle Straight
- Pull Handle Triangle
- Aluminum Bars (Pair)
- Metal Plate Assembly

TRAINING LIFE VEST & SURVIVAL KIT

Training Life Vest

Made of TSO approved fabric, our life preservers are available as a single or dual cell vest. All our training life vests can be overhauled. Available with or without whistle.

Available Models

- DEMO ONLY (For donning)
- DEMO with removable / replaceable / washable oral tube
- Live Training

Available Equipment (Sold Separately)

- 16g CO2 Cylinder Training
- 33g CO2 Cylinder

Training Life Vest Pouch

RF Welded materials designed to simulate the motion of opening an OEM life preserver pouch. Each unit is re-sealable for repeated use. The pull strength was designed into these pouches to allow pull force training to be as realistic as possible.

Training Survival Kit

BASIC OR CUSTOMISED

The basic survival kit contains a variety of items to familiarize the cabin crew with typical items found in a standard survival kit.

The kit and its contents are designed to present training staff and crew with an overview and should only be used for classroom based desktop reference training and not for any emergency purpose, medical or otherwise.

NEW PRODUCTS FOR 2020!

Type 5 – Air Liquide-Style Training PBE

New!

The type 5 has a weighted dummy O² circular cylinder and removable / replaceable neck piece. The PBE is designed to replicate the experience of using the OEM version as realistically as possible. Its weight, physical appearance, speed of donning and dimension closely resembles its TSO version.

Delivery start to be announced.

Type Specific Girt Trainer

New!

Generated by popular demand, our type specific girt trainer provides the user with a true OEM experience of pulling the handle to inflate an evacuation slide and detach a girt. You are now able to replicate the motion and force needed to perform these tasks during a real Emergency Evacuation situation.

Delivery start to be announced.

FEATURES

- Uses realistic pull force for both pull to inflate and pull to release slide
- Replicates motion (pull movement, sequence of actions)
- Can be applied directly to your evacuation slide.
